All numbers reflect status at time of release. Demographic information reflects confirmed cases only. Deaths are included in the number of confirmed cases. All numbers displayed are provisional and are subject to change.

Since yesterday's release, we have had two newly-confirmed case of COVID-19. Therefore, our overall number is 208 confirmed COVID-19 cases in Macon County.

We encourage all community members to implement social distancing and face covering best practices to limit the spread of COVID-19. People with COVID-19 have reported a wide range of symptoms. If you experience symptoms of COVID-19 with which you are concerned, please call your primary care physician first. Do not show up at a hospital emergency room or doctor's office unless it is a true emergency.

Individuals without a primary care physician can call:

- DMH Medical Group: (217) 876-2856
- HSHS Medical Group Patient Advocate: 844-520-8897
- Crossing Healthcare: (217) 877-9117
- SIU: (217) 872-3800

For COVID-19 screening, please call one of the following:

- Crossing Healthcare: (217) 877-9117
- HSHS St. Mary's Hospital 24/7 COVID-19 Hotline: (217) 464-2966
- HSHS Medical Group offers free virtual assessments for COVID-19 at www.anytimecare.com.

Anyone entering healthcare facilities should be prepared to be screened before entering.

PSA: Staying Hydrated

Getting enough water every day is important for your health. Healthy people meet their fluid needs by drinking when thirsty and drinking with meals. Most of your fluid needs are met through the water and beverages you drink. However, you can get some fluids through the foods that you eat. For example, broth soups and foods with high water content such as celery, tomatoes, or melons can contribute to fluid intake.

Water helps your body:

- Keep your temperature normal
- Lubricate and cushion joints
- Protect your spinal cord and other sensitive tissues
- Get rid of wastes through urination, perspiration, and bowel movements

Your body needs more water when you are:

- In hot climates
- More physically active
- Running a fever
- Having diarrhea or vomiting

If you think you are not getting enough water, these tips may help:

- Carry a water bottle for easy access when you are at work or running errands.
- Freeze some freezer safe water bottles. Take one with you for ice-cold water all day long.
- Choose water instead of sugar-sweetened beverages.
- Choose water when eating out. Generally, you will save money and reduce calories.
- Add a wedge of lime or lemon to your water. This can help improve the taste and help you drink more water than you usually do.
