Food Safety at Temporary Food Events

Street fairs, celebrations, and other similar events call for food service vendors to be set up outdoors or in locations where keeping foods safe and sanitary become a real challenge. Following these guidelines will help reduce the risk of foodborne illness.

PERMITS AND FEES- A temporary health permit shall be prominently displayed for each food/drink vendor. All vendors must complete an application and submit it with the appropriate fee. *Please note that all applications submitted less than 7 days prior to the day of the event will be charged a late fee of \$50, in addition to the application fee.*

PRE-OPENING INSPECTION- Food/drink vendors may be required to have a pre-opening inspection prior to any food/drink handling.

MENU- Keep your menu simple, and keep potentially hazardous foods (meats, cut-up fruits and vegetables, dairy, etc.) to a minimum. *Home preparation of foods is not allowed.*

BOOTH- All food preparation must be done in an approved booth/kitchen with approved equipment.

TRANSPORTATION- If foods are to be transported from one location to another, keep them covered and provide adequate temperature controls. Use refrigerated trucks to keep cold food cold (41°F or below), and insulated containers to keep hot food hot (135°F or above).

STORAGE- All food, equipment and single use items must be stored off the ground.

ICE- Ice used to cool cans and bottles cannot be used in beverages and is to be stored separately. Dispense ice from a bag with a handled scoop, never with hands or any type of container. Ice shall be made from a potable water source.

REFRIGERATION- Mechanical refrigeration is required. An ice chest with ice cannot be used for any potentially hazardous items. Thermometers must be in each cold holding unit.

COOKING- See the minimum cooking temperature chart.

FOOD ITEM (RAW)	MINIMUM COOKING TEMPERATURES
Fish Fillets	145°/ 15 seconds
Beef Steaks	145°/ 15 seconds
Pork Chops	155°/ 15 seconds
Sausage	155°/ 15 seconds
Hamburger	155°/ 15 seconds
Chicken/Turkey	165°/ 15 seconds

FULLY COOKED COMMERCIALY PROCESSED FOOD ITEMS	MINIMUM REHEATING TEMPERATURES
Hot Dogs	135°F/ 15 seconds
Brats	135°F/ 15 seconds
Canned Chili	135°F/ 15 seconds

**KEEP THIS PAGE
FOR REFERENCE**

HOT HOLDING- Electrical commercial equipment is requested. Propane stoves, grills, or canned heat may be used and should be available for backup. An accurate, sanitized metal stemmed thermometer must be available and used to check internal food temperature.

FOOD DISPLAY AND DISPENSING- Keep foods covered to protect them from insects, dust, etc. Keep food away from customer contamination.

NO LEFTOVERS- No food can be made ahead of time and cooled down for use at a later date/time. All cooked food must be served the same day. Food left at the end of the day must be discarded. Plan accordingly.

HANDWASHING- The vendor shall have warm running water, soap, individual paper towels, and a bucket to collect the dirty water. A jug of warm water with a turn spout is an acceptable method. Liquid type hand sanitizers will not be allowed.

HEALTH AND HYGIENE- Anyone with nausea, fever, vomiting, diarrhea, open sores and/or cuts on their hands, etc. must not be allowed to work in the food booth. Workers are to wear clean outer garments, an effective hair restraint, and must not smoke, eat, or drink in the booth.

DISHWASHING- Wash equipment and utensils in a four step sanitizing process: washing in hot, soapy water; rinsing in clean water; chemical sanitizing; and air drying.

WIPING CLOTHS- Rinse and store the wiping cloths in a bucket of sanitizer. Use the appropriate sanitizer test strips. No household sprays will be allowed.

WATER SUPPLY- Obtain your water for a potable source. Your connections and hoses shall be constructed, located, and maintained to avoid contamination. Food grade hoses are required and devices (i.e. vacuum breakers) must be provided to prevent back flow and back siphonage when a connection to a water supply is needed. No leaky connections will be accepted.

LIQUID WASTE- This waste cannot be dumped into streets, storm drains, or onto the ground. Use containers to collect liquid waste and discard in a sanitary manner.

REFUSE- Covered containers should be available- one for your garbage and another for your customers' garbage.

FANS- Fans will be required to help eliminate flies, and/or other possible contamination.
