6

Deaths

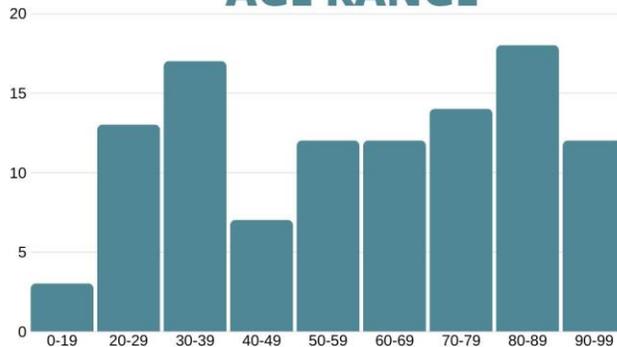

11

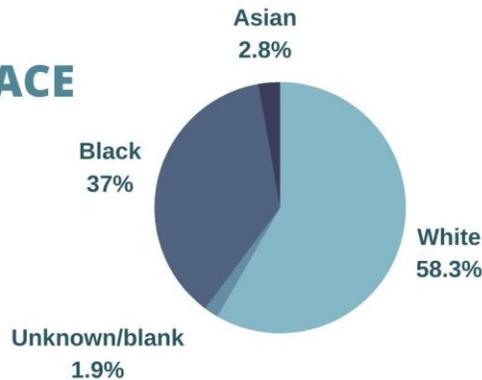

GENDER

AGE RANGE

RACE

All numbers reflect status at time of release. Demographic information reflects confirmed cases only. Deaths are included in the number of confirmed cases. All numbers displayed are provisional and are subject to change.

Thus far, 765 total tests have been performed in Macon County. Since yesterday's press release, we have had one newly-confirmed case of COVID-19. Therefore, our overall number is 108 confirmed COVID-19 cases in Macon County. Of the 108 total confirmed cases of COVID-19, 75 are associated with congregate living facilities ("associated with" means staff and residents of facility(ies)).

The bulk of positive cases in our community have been related to a congregate living facility. However, the public **should not** have a false sense of security that only congregate living facilities are at risk. There are symptomatic and asymptomatic people in our community that have COVID-19 and could potentially be spreading it to others. That is one reason why it is so incredibly important that preventive measures continue to be taken by all. Any contact with others is an increased risk of exposure and should be limited whenever possible.

All community members, whether feeling ill or well, must implement social distancing best practices to limit the spread and contraction of COVID-19. This means staying home and away from as many people as possible as often as possible. Follow the precautionary measures – thorough and frequent hand washing; using a mask to cover your face in public and congregate settings; self-monitoring your own health condition – at every opportunity.

People with COVID-19 have reported a wide range of symptoms leading to the Centers for Disease Control and Prevention (CDC) to update the list of symptoms. Symptoms may appear two to fourteen days after exposure to the virus. People with the following symptoms or combinations of symptoms may have COVID-19: cough and shortness of breath or difficulty breathing. Additionally, those with **at least two** of the following symptoms may have COVID-19: fever, chills, repeated shaking with chills, muscle pain, headache, sore throat, and/or new loss of taste or smell. This list is not all inclusive. If you experience symptoms with which you are concerned, do not present at a hospital emergency room or doctor's office unless it is a true emergency. Call your primary care physician first. Individuals without a primary care physician can call:

- DMH Medical Group at (217) 876-2856.
- HSHS Medical Group Patient Advocate at 844-520-8897.
- Crossing Healthcare at (217) 877-9117.
- SIU at (217) 872-3800.

For COVID-19 screening, the following resources are available:

- Memorial Health System's respiratory screening clinic located at DMH Express Care East (4455 U.S. Route 36 East); open seven days a week, 8 a.m. - 6 p.m. Before coming to the respiratory clinic, individuals should call (217) 876-1200.
- Crossing Healthcare, 320 East Central Avenue in Decatur. Call (217) 877-9117 for an appointment.
- HSHS St. Mary's Hospital 24/7 COVID-19 Hotline at (217) 464-2966
- HSHS Medical Group offers free virtual assessments for COVID-19 at www.anytimecare.com.

Anyone entering healthcare facilities should be prepared to be screened before entering.
