Anyone entering healthcare facilities should be prepared to be screened before entering.

PSA: Wear a Helmet

A traumatic brain injury (TBI) is caused by a blow or jolt to the head or a penetrating head injury that disrupts the normal function of the brain. One way to prevent a TBI is for you and your children to put on a helmet when:

- riding a bike, motorcycle, snowmobile, scooter, or all-terrain vehicle
- playing a contact sport, such as football, ice hockey, or boxing
- using in-line skates or riding a skateboard
- batting and running bases in baseball or softball
- riding a horse
- skiing or snowboarding
